ZIKRA MOHAMMED
Software Engineering Student | AI Research Enthusiast | Technical Evaluator
Location: Ethiopia
Email: zikramohammed00@gmail.com
Phone Number: +251904276328

PROFESSIONAL SUMMARY

Senior Software Engineering undergraduate at Addis Ababa University with strong analytical, research, and technical writing skills. Experienced in evaluating software systems, analyzing technical documentation, conducting cybersecurity assessments, and developing AI-assisted applications. Passionate about artificial intelligence, data quality, and research, with experience interpreting technical diagrams, system architectures, datasets, and software specifications. Adept at producing structured, evidence-based evaluations and communicating complex technical concepts clearly. Seeking to contribute domain expertise to AI evaluation and annotation projects in a flexible, research-focused environment.

EDUCATION

Addis Ababa University
Bachelor of Science in Software Engineering
Expected Graduation: 2027
Relevant Coursework:

- Artificial Intelligence
- Data Structures & Algorithms
- Software Engineering
- Database Systems
- Computer Networks
- Computer Security & Cryptography
- Operating Systems
- Cloud Computing
- Human Computer Interaction
- Software Testing

TECHNICAL SKILLS

Programming Languages
Python • Java • JavaScript • TypeScript • SQL • Dart
Frameworks & Technologies
React • Node.js • Express.js • Flutter • NestJS • Prisma • Docker • Git
AI & Data
Large Language Models (LLMs) • AI Prompt Engineering • Data Annotation • Technical Evaluation • Dataset Validation • Structured Analysis
Research & Documentation
Technical Writing • Research Documentation • System Analysis • Requirements Analysis • Quality Assurance • Evidence-Based Evaluation

Visualization & Analysis
System Architecture Diagrams • UML • Network Topologies • Database Schemas • Flowcharts • Technical Documentation

---

RELEVANT EXPERIENCE

AI and Software Research Projects

Independent Research & Academic Projects

- Evaluated software architectures, backend systems, and security implementations through multiple academic and personal projects.
- Produced structured technical documentation, security reports, implementation guides, and system analyses.
- Reviewed complex technical specifications and identified inconsistencies, implementation gaps, and optimization opportunities.
- Applied analytical reasoning to assess system quality, functionality, and technical correctness.
- Worked extensively with AI tools, including large language models, to improve software development workflows, technical documentation, and evaluation processes.
- Interpreted software diagrams, database schemas, network topologies, and architectural designs to support development and documentation.

Software Engineering Projects

Single Sign-On Integration for Open edX

- Implemented secure authentication workflows using Keycloak and Open edX.
- Evaluated authentication logic, security requirements, and identity management workflows.
- Documented implementation details and proposed security improvements.

Dormitory Management System

- Developed full-stack features using React, Node.js, PostgreSQL, and Prisma.
- Analyzed user requirements and translated them into scalable software solutions.
- Produced technical documentation and evaluated system workflows for functionality and usability.

Network Security & Infrastructure Design

- Designed enterprise-scale secure network architectures.
- Produced implementation reports, topology diagrams, and security documentation.
- Applied cybersecurity principles to evaluate infrastructure quality and identify potential vulnerabilities.

RESEARCH & ANALYTICAL EXPERIENCE

- Conducted independent technical research across software engineering, cybersecurity, AI systems, and cloud computing.
- Authored detailed reports explaining technical decisions, methodologies, and implementation strategies.
- Evaluated technical materials using structured reasoning and evidence-based analysis.
- Interpreted complex visual information, including network diagrams, software architecture diagrams, database schemas, and workflow models.

LEADERSHIP & ACTIVITIES

Executive Team Member

AAU AI & Robotics Club

- Collaborated on AI and robotics initiatives.
- Participated in technical problem-solving and research discussions.
- Contributed to software development and innovation projects.

Executive Team Member

Cyber Vanguard Club

- Organized cybersecurity events and Capture The Flag (CTF) activities.
- Assisted in technical workshops and educational programs.
- Promoted cybersecurity awareness within the university community.

ADDITIONAL QUALIFICATIONS

- Strong English technical writing skills.
- Excellent analytical and critical thinking abilities.
- Experience working independently on research-driven projects.
- Comfortable interpreting technical diagrams and visual documentation.
- Fast learner with exceptional attention to detail.
- Experienced using AI tools and large language models for research, evaluation, and productivity.
- Strong problem-solving and structured reasoning skills.
